**Subject:** Microsoft Settlement

I was happy with the Microsoft proposal beeing rejected. Here's some settlement ideas:

Microsoft shall not buy any intellectual properties, shares or merge with any company unless approved by the justice department for a 15 years span. Microsoft shall be split into different entities : OS, Softwares and Services and hardware.

Microsoft should open their API to other OS.

Microsoft shall not have exclusive deal with hardware companies regarding their OS and software for a 5 year span.

If Microsoft is found guilty afterward of anti-competitive practice, Microsoft should be fine 1B\$ given to a world charity group.

This will give a fair options for both Microsoft, consumers and competitors.

Regards,

Gregory Juster
